

**In the Claims**

For the convenience of the Examiner, all pending claims are set forth below, whether or not an amendment is made. Please amend the claims as follows:

1. **(Currently Amended)** A directed web browsing system comprising:  
a customizable director, the customizable director operable to provide web browsing capabilities and comprising:  
a border portion having a forward element, a play element and a back element;  
a display portion operable to display a first web page, the first web page having a link, the link having an associated second web page; and  
an exclusive set of first web pages associated with the customizable director and wherein a user associated with the customizable director is required to retrieve at least one of the first web pages prior to retrieving a second web page distinct from the first web pages.  
~~pages; and~~  
~~a cycle time associated with at least one of the first web pages.~~

2. **(Currently Amended)** The system according to Claim 1, wherein the customizable ~~browser~~ director further comprises a timer module operable to determine the expiration ~~of the~~ of a cycle time associated with the first web pages and generated an indication that the cycle time has expired.

3. **(Currently Amended)** The system according to Claim 1, wherein the customizable ~~browser~~ director further comprises a unique identifier and wherein the first web pages have an associated uniform resource locator.

4. **(Original)** The system according to Claim 1, wherein the border portion further comprises at least one channel button operable to select a category of content from a channel server.

5. **(Original)** The directed web browsing system according to Claim 1 and further comprising a filter module operable to modify the second web page in response to selecting the link based on site criteria associated with the customizable director.

6. **(Currently Amended)** A method for directed web browsing comprising:  
providing a director operable to provide web browsing capabilities;  
displaying, using the director, a first web page having a first link, the first link having  
an associated second web page;  
selecting the first link;  
determining whether a predetermined cycle time associated with the first web page  
has expired; and  
displaying a third web page in response to the expiration of the predetermined cycle  
time.

7. **(Original)** The method for directed web browsing according to Claim 6 and  
further comprising filtering the second web page in response to the selection of the first link  
based on site criteria associated with the web browser.

8. **(Original)** The method for directed web browsing according to Claim 7,  
wherein filtering the second web page comprises:  
comparing at least one second link associated with the second web page to at least  
one forbidden site associated with the site criteria; and  
removing second links which match at least a portion of any of the forbidden sites  
associated with the site criteria.

9. **(Original)** The method for directed web browsing according to Claim 6 and  
further comprising:  
receiving a uniform resource locator from a user associated with the director; and  
determining whether the uniform resource locator is associated with an allowed web  
site based on criteria associated with the director.

10. **(Original)** The method for controlled web browsing according to Claim 6,  
wherein determining the expiration of the cycle time comprises:  
counting down the cycle time; and  
generating an indication that the cycle time has elapsed.

11. **(Original)** The method for controlled web browsing according to Claim 10, wherein displaying the third web page comprises:

loading the third web page in response to the indication that the cycle time has elapsed; and

formatting the third web page based on hypertext markup language tags associated with the first web page.

12. **(Currently Amended)** A method for directed web browsing comprising:  
customizing a director operable to provide web browsing capabilities;  
determining a first web page to present to a user associated with the director, the first  
web page having a link associated with a second web page; and  
~~determining a cycle time associated with the first web page, the cycle time indicating~~  
~~the length of time the first web page is to be displayed to the user; and~~  
preventing the user from requesting a third web page distinct from the first and  
second web pages.

13. **(Original)** The method for directed web browsing according to Claim 12,  
wherein preventing the user from requesting the third web page comprises allowing the user  
to selected the third web page from a further link associated with either of the first and  
second web pages and preventing the user from providing a portion of a uniform resource  
locator.

14. **(Currently Amended)** The method for directed web browsing according to  
~~Claim 12~~ Claim 13, wherein preventing the user from providing the portion of the uniform  
resource locator comprises preventing the user from providing any portion of the uniform  
resource locator.

15. **(Currently Amended)** ~~The method for directed web browsing according to Claim 12~~ A method for directed web browsing comprising:

customizing a director operable to provide web browsing capabilities, wherein customizing the director comprises:

- editing a border associated with the director;
- editing a display area associated with the director;
- adding at least one navigation element to the border; and

adding at least one sponsor related element to the ~~border~~ border;

determining a first web page to present to a user associated with the director, the first web page having a link associated with a second web page;

determining a cycle time associated with the first web page, the cycle time indicating the length of time the first web page is to be displayed to the user; and

preventing the user from requesting a third web page distinct from the first and second web pages.

16. **(Original)** The method for directed web browsing according to Claim 15, wherein the sponsor comprises a corporation.

17. **(Original)** The method for directed web browsing according to Claim 15 and further comprising:

- subscribing, by the user, to a channel available from a channel server; and
- adding a channel button associated with the channel to the border.

18. **(Original)** The method for directed web browsing according to Claim 17 and further comprising:

- receiving a first item of content from the channel server; and
- generating a second item of content for communication to the channel server and distribution to a further director distinct from the director.

19. **(Currently Amended)** The method for directed web browsing according to Claim 12, ~~wherein~~ further comprising determining the expiration ~~of the~~ of a cycle time ~~comprises by:~~

counting down the cycle time;  
determining a fourth web page to display to the user, the fourth web page being associated with the director; and  
generating an indication that the cycle time has elapsed.

20. **(Original)** The method for directed web browsing according to Claim 19, wherein displaying the fourth web page comprises:

loading the fourth web page in response to the indication that the cycle time has elapsed; and  
formatting the fourth web page based on hypertext markup language tags associated with the first web page.

21. **(Original)** The method for directed web browsing according to Claim 12 and further comprising filtering the second web page based on site criteria associated with the web browser.

22. **(Original)** The method for directed web browsing according to Claim 12 and further comprising determining network performance statistics associated with a remote site.

23. **(Currently Amended)** The method for directed web browsing according to Claim 22, wherein determining network performance statistics comprises:

receiving, at the director, a selection of a statistics enabled uniform resource locator (URL) associated with the remote site;  
communicating ~~the statistics~~ a statistics enabled URL to a channel server;  
receiving, at the director, a request to determine network performance statistics;  
determining network performance data between the director and the remote site; and  
communicating the network performance data to the channel server.

24. **(Original)** The method for directed web browsing according to Claim 23, wherein the network performance data comprises a latency between the director and the remote site.

25. **(Currently Amended)** A method for directed web browsing comprising:  
providing a graphical user interface;  
displaying a folder on the graphical user interface;  
displaying a director icon in the folder, the director icon having an associated director, the director operable to provide web browsing capabilities, the director having an associated exclusive set of first web pages associated with the director and wherein a user associated with the director is required to retrieve at least one of the first web pages prior to retrieving a second web page distinct from the first web pages;  
selecting a selected one of the first web pages to present to a user associated with the director in response to the selection of the associated director icon; and  
~~determining a cycle time associated with the first web page in response to the selection of the selected one of the first web pages, the cycle time indicating the length of time the selected one of first web pages is to be displayed to the user; and~~  
preventing the user from requesting a third web page distinct from the first and second web pages.

26. **(Original)** The method for directed web browsing according to Claim 25, wherein the first web pages comprise information associated with a sponsor associated with the director.

27. **(Currently Amended)** The method for directed web browsing according to ~~Claim 25~~ Claim 26, wherein the sponsor comprises a corporation.

28. **(Original)** The method for directed web browsing according to Claim 25, wherein at least one of the second web pages comprises advertising information associated with a sponsor associated with the director.

29. **(Original)** The method for directed web browsing according to Claim 25 and further comprising installing the folder along with the graphical user interface.

30. **(Original)** The method for directed web browsing according to Claim 25, wherein the director icon comprises an online banking icon.

31. **(Original)** A channel server for directed web browsing comprising:  
an identifier module;  
an identifier database operable to communicate with the identifier module and storing at least one identifier;  
a subscriber database operable to communicate with the identifier module and associating at least one of the identifiers with at least one channel;  
a channel module operable to communicate with the identifier module and distribute content to the subscribers associated with the channels based on the channel;  
a distribution module operable to communicate with the identifier module and retrieve content generated by a user associated with a director; and  
an electronic mail module operable to communicate with the identifier module and communicate anonymous electronic mail between directors.

32. **(New)** The system according to Claim 1, further comprising a cycle time associated with at least one of the first web pages.

33. **(New)** The method for directed web browsing according to Claim 12, further comprising determining a cycle time associated with the first web page, the cycle time indicating the length of time the first web page is to be displayed to the user.

34. **(New)** The method for directed web browsing according to Claim 25, further comprising determining a cycle time associated with the first web page in response to the selection of the selected one of the first web pages, the cycle time indicating the length of time the selected one of first web pages is to be displayed to the user.
